DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-82, drawn to decompressing received headerless packets, classified in class 370, subclass 389.
 - II. Claims 83-93, drawn to determining whether a size of a payload permits the transmission of a header with a packet, classified in class 370, subclass 471.
 - III. Claims 94-107, drawn to transmitting a header update based on the determination of a talk spurt, classified in class 370, subclass 474.
2. Inventions 1-82, 83-93, and 94-107 are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions functions. Claims 1-82 disclose a method and system for transmitting and receiving headerless packets, where the received headerless packets are decompressed. Claims 83-93 disclose a method for checking a packet payload sized to determine if it permits the transmission of a header with the packet. Claims 94-107 disclose a method for determining if a transmission includes a talk spurt and in response to the determination, transmitting a header update.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
